**Von Tim Lebbon : Alien: Out of the Shadows** before purchasing it in order to gage whether or not it would be

worth my time, and all praised Alien: Out of the Shadows:

**Kurzbeschreibung**The official new novel set between the events of Alien and Aliens An original novel based on the blockbuster films from 20th Century Fox Out Of The Shadows As a child, Chris Hooper dreamed of monsters. But in deep space, he found only darkness and isolation. Then on planet LV178, he and his fellow miners discovered a storm-scoured, sand-blasted helland trimonite, the hardest material known to man. When a shuttle crashes into the mining ship Marion, the miners learn that there was more than trimonite deep in the caverns. there was evil, hibernatingand waiting for suitable prey. Hoop and his associates uncover a nest of Xenomorphs, and hell takes on new meaning. Quickly they discover that their only hope lies with the unlikeliest of saviors... Ellen Ripley, the last human survivor of the salvage ship Nostromo

**Pressestimmen**Lebbons ability to make this a perfect fit is pretty damn amazing. And the telling of this tale in and of itself, without regard to external continuity, is a thing of beauty. Set between the first two films, it aptly captures the flavor of both, melded into one dark work of art. It contains the claustrophobia and shadowy, stark fear, not to mention the brilliant simplicity, of ALIEN, with the weapons-toting action thrills of the second. Book Devil "A gripping and recommended read" - Project Fandom "If youre a fan of Xenomorphs or just enjoy great sci-fi/horror books, then you should definitely check out this novel." - Rely on Horror "Lebbon provides some juicy details and ideas concerning the origins of the xenomorphs while adding to Ripleys personal yet-to-be-discovered connection to the monsters." - High Def Digest "The writing was excellent. The pacing was spot on. Lebbon nailed Ripleys voice so that every time I read a line of her dialogue I heard Sigourney Weavers voice in my mind." - Blogcritics "A fun read." - LA Beat "Lebbon weaves a Xenomorph-ridden thrill ride, that perfectly slides into the established canon of the everlasting Alien series." - Mind of Tatlock "Lebbon is an amazing story teller." - Ravenous Monster "Tim Lebbon has been a terrific author from the jump, and he was the perfect man for this specific job. Lebbons care for words and attention to detail proves to be profoundly rewarding, as Alien: Out of the Shadows is the finest venture back into the world of the xenomorph since Ridley Scotts Prometheus (which, in my opinion is only eclipsed by Alien and Aliens, despite the fact that I love the silly Alien vs. Predator). This is one of the finest if not the finest film tie-ins Ive read in years. And believe it or not, Out of the Shadows could well prove to be one of the years very best." - Horror Novel "The aliens are just as menacing and brutal as always, but the real horror of the novel lies in the suspense elements." - Smart Girls Love SciFI "Plenty of nail-biting scenes." - Geek Dad "The writing is superb." - Tracing the Stars Even if you have a passing interest in the Alien universe this book comes recommended, deftly balancing appeal to casual readers and hardcore fans alike. Gorge on it and squirm at the gore. - Legend of Geek "Tim Lebbon does a fine job bringing another Ellen Ripley adventure to life...If youre a fan of ALIENS then its a MUST read." - Retrenders "Manages to recreate the some of the better elements of the franchise." - Renegade Cinema "I had trouble putting this one down." - Fangirl Confessions "Succeeds brilliantly is in its action sequences" - Den of Geek "For an Alien-based story, Out of the Shadows does exactly what its supposed to do. Its Ripley and pals vs. Aliens, with all the face-huggering, hive-resinning, chest-bursting mayhem you can shake a plasma torch at." - Pop Mythology "With high drama and non-stop suspense, Alien: Out of the Shadows is a quick read and a must have for fans of the Alien franchise." - The Geek Girl Project "Lebbon has put together a fully realized Alien universe story that measures up to the best of the franchise. Its a story that fans probably would have hoped to see instead of what ended up in Prometheus." - Borg.com
