interessanter StilVon ElephantomI loved the style of this book: The story of how the main character became famous is told in retrospect and this is interrupted by excerpts of interviews of the people around her that comment on her. I found that very refreshing and amusing. So for that I would have given 5 stars.My problem with the book is that I don't

like the main character. How can anybody seriously contemplate in basking in someone else's glory? I find it painful to read about it as this struggle between being morally sound and taking the credit is a major part of the book. And then there is this stereotype shoe-purchasing for therapy, the ongoing trying to lose 5 pounds in one morning and then comfort eating her way through a weekend and other stereotype female behaviour that I find extremely irritating and not funny... Also she is intimidated by her mother, her boss and other people around her all her life and then - surprise - she becomes brave all of a sudden? BUT: Whoever doesn't mind this will like this book.
