the few Bradley books that left me cold Von Prima Donna Three stars because it started out just fine. Three stars because the ending made me angry. I've been a Celeste Bradley reader for a long time, though I usually go long periods between books. This one was good...up to a point. I liked the idea, though the description gave me a picture of that plot that wasn't true at all, and the writing was entertaining. Unfortunately it also had some serious flaws. First and foremost, I don't mind sexual spanking in books. Or even the light to dark side of BDSM. I was even intrigued by its inclusion in the story as a variant on the normal missionary we get in these books. It's just that there wasn't even a hint of it in the man's character or thoughts. His tragic backstory fell into place out of nowhere. I was upset by the inventor plot line fizzling into nothingness. I also had an issue with the lack of apology on his part for wrongdoing, the fact that the hero told her of his plans to help her rather than include her, and then he goes off and pulls the Noble Self-Sacrifice move and the characters act like she should be flattered. The heroine isn't stupid. Repressed and just getting her wings, yes, but not stupid. I didn't like ignoring her intelligence. Speaking of the heroine, I thought she had a legitimate reason to be angry and that the hero ought to do some groveling instead of Self-Sacrificing. It felt like he was running away. So when her anger melts away in the realization that she's a stronger woman because of him (which is true), I still felt cheated. Everything's okay--despite where she found him, despite the fact that he took a week to even see her after a major event--because he put her in touch with her confidence? That just didn't wash. It felt like that rainbow and sunshine ending that didn't actually address any issues or resolve real-world problems. It's a romance, but it doesn't mean these people live in a vacuum. This book had potential--great, great potential, but in the end the story let me down.
