Kundenrezensionen Hilfreichste Kundenrezensionen 3 von 3 Kunden fanden die folgende Rezension hilfreich. Antarktis, Kite und Wahnsinn Von Arno Gndisch Tim Curran setzt dort an, wo H.P. Lovecraft mit "At the Mountains of Madness" aufhrte: eine wissenschaftliche Expedition dringt in dasselbe Gebiet vor, das von Lovecrafts Explorern schon einmal erforscht wurde. Folgerichtig werden tiefgefrorene Leichen einer bis dato unbekanntem Lebensform

entdeckt...und das Grauen nimmt seinen Lauf...Die thematische Nähe zu Lovecrafts Vorlage ist unübersehbar, was der Autor jedoch als neues Element einbringt, ist die einzigartige Beschreibung des Zwischenspiels von extremer Isolation, Klaustrophobie, Paranoia und dem Gefühl, einer fremden, barmherzigen Existenz wehrlos ausgeliefert zu sein. Der Autor zieht alle Register des psychologischen Grauens und bleibt dabei Lovecraft stilistisch verbunden. Wir wissen nun, was Lovecrafts Piloten seinerzeit in den Wahnsinn trieb..Fans von H.P. Lovecraft und filmischem Antarktishorror (The Thing, Alien vs. Predator) werden dieses Buch lieben, allen anderen Freunden des psychologischen Horrors sei dieses Buch wärmstens empfohlen. Fünf eisige Sterne und eine Kaufempfehlung für die kommende kalte Jahreszeit!

Kurzbeschreibung*Revised and expanded with 70,000 words cut from the original "Hive". Nothing stays buried forever in Antarctica. The ice shield above Lake Vordog is forty million years old. Beneath the black waters, amongst the sediment and abyssal murk there is a city much older. Within its flooded ruins, a diabolic and primeval horror is rising up to claim mankind. In frozen tombs beneath the glaciers to abandoned outposts haunted by alien ghosts...in isolated windblown research camps to glacial ice caves where prehistoric abominations crawl through the ruins of a pre-human civilization, it is beginning. The long, frozen dormancy of ancient evil is at an end. The end times of the human race has begun

Synopsis A SEQUEL OVER 70 YEARS IN THE MAKING Jimmy Hayes had a bad feeling the moment he arrived at Kharkhov Station, and it had nothing to do with the cold, the snow, and the four solid months of darkness at the South Pole. But when mummies were discovered in the mountains, Hayes knew the cause of his bad feeling. Only he didn't know what would happen when the ruins of a pre-human civilization was discovered in a series of sub-surface caverns. That was when the real trouble at Kharkhov Station began...Tim Curran (author of Skin Medicine) presents a stunning sequel to H.P. Lovecraft's At the Mountains of Madness.
