BRILLIANTLY TOLD STORYVon Sibyl MoryArchaeologist Ripley Gaines is called to Virginia following a Cosega find, giving vital information on the early history of the human race. He is a driven professor, with little time for dating , obsessed with proving his Cosega theory that 'advanced' humans have been around for hundreds of thousands of years. Then he meets a journalist, Gale Asher, at the same time as the discovery of artifacts with strange qualities predating the origins of homo sapiens by millions of years. He and Gale take flight, pursued by Federal and Vatican agents, as ancient prophecies start to get fulfilled foretelling the Vatican's demise. Can Gaines find out the truth about the earliest civilizations on earth before he and those close to him are killed? The trilogy is a thrilling account of Gale and Ripley fleeing capture and killing, just about managing to keep one step ahead... Or do they? Is there a traitor close to Ripley, and who could it be? And who is Ripley? Is he connected to a figure from the past, the complete antithesis of what he is now? And who really is Gale? These artifacts are a technological marvel that the whole world is after, with the fear a world war could result in the fight over them. This great story blends together personal drama and cosmic events in a way that will keep you enthralled and guessing to the end. The trilogy rises to a rousing finale,

with a step-by-step revelation of an advanced civilization that existed before humans, and with us kept in total suspense over the outcome. A brilliantly-crafted tale drawing together all the different threads of the story into a sense of rising tension and cataclysmic climax. Brandt Legg has created the most exciting and fascinating of reads. Not to be missed.0 von 0 Kunden fanden die folgende Rezension hilfreich.
